Harman Trident SF Series Wood, Coal & Oil Furnaces

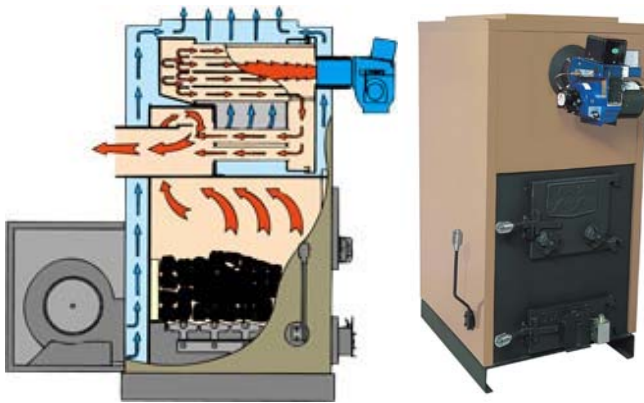

Harman Hot-air Furnaces have three internal systems that help maintain a clean, consistent and comfortable temperature throughout your entire home: a complete automatic blower system, an automatic draft system with high limit control and a filter system to ensure clean air. Harman's sophisticated draft control system knows when to cause the fire to burn hotter and supply just the right amount of heat.

SF-1500-A, SF-2500, SF-3500-A
Wood, Coal Hot Air Furnaces

Features:

- Exclusive Harman Spiral Chamber
- Harman Grate System
- Secondary Air Flow
- Heavy Duty Blower
- Reversible Filter Box

SF-2600-SS multi-fuel furnace with an 85% efficient oil burner system. The oil burner fires into a separate combustion chamber, so the oil nozzle will never clog from the soot from wood or coal fires.

Two separate thermostats – one for wood or coal and one for oil – let you set your furnace to burn oil as a backup in case your fire burns out. Or you can set it to burn oil as the primary fuel. It's that easy.
